ABOUT ME

I'm a data enthusiast with over 6 years of experience helping teams make smart decisions by turning data into clear insights. I specialize in gathering, processing, and analyzing information to support strategic goals. Right now, I'm sharpening my Python and SQL skills to build and improve Business Intelligence solutions

WORK EXPERIENCE

DATA ANALYST

S&P Global(06.2019 - Present)

- Responsible for collecting and analyzing data on public property in the Polish market, covering 800 companies.
- Collaborated in an international, cross-functional team using Polish, English, and Spanish to ensure smooth communication and project success.
- Contributed to automation projects using Python scripts and SQL queries that reduced document processing time by 50%, optimizing workflows and boosting team efficiency.
- Managed data quality initiatives by performing thorough data validation and cleaning, reducing errors and client-reported issues, which improved overall data reliability.
- Developed and maintained interactive Power BI reports and dashboards to provide actionable insights for stakeholders and support data-driven decision making.
- Applied data modeling techniques to structure datasets for efficient querying and analysis.

INTERNATIONAL FORWARDER

ABC Czepczynski (01.2017 - 05.2019)

- Managed and supervised transportation logistics for freight across multiple European countries, ensuring timely delivery and compliance with regulations.
- Coordinated communication between clients, drivers, and warehouses to optimize route planning and resolve issues promptly.
- Maintained accurate records and documentation for shipments, tracking status and ensuring all data was up to date.
- Utilized data tracking systems to monitor shipment progress and identify opportunities to improve delivery efficiency.
- Analyzed transport data to support reporting and help streamline operations, contributing to improved client satisfaction.
